

Cut all shapes from 18mm (3/4") plywood and drill all the screw holes with a 5mm (3/16") drill bit. Drawing layouts are designed to make life easier when cutting from 2440mm x 1220mm (8' x 4') board.

Carefully mark out and label each component before accurately cutting and drilling them.

Please note: We stretch around 10cm (4") after death due to the relaxation of the tendons and muscles. This will mean coffin sizes appear large.

Instructions to cut shelf components for Shelves for Life (size 3)

To fit heights between 173mm - 183mm (5'8" - 6')
